

StrapPack®

Semi-Automatic Strapping Machine

The innovative STR-1 is Strapack's latest long awaited semi-automatic strapping machine.

Designed and manufactured by Strapack's own manufacturing divisions to meet customer needs.

The STR-1 is solid and durable, manufactured with quality materials.

■ User-friendly Design

With a rounded corner design, it protects operators and packages from possible hazards during operations.

■ Adjustable Table Height

The table height can easily be adjusted from 750mm through 950mm (25mm increments) and this makes it comfortable for users to operate at their desired height.

■ Automatic Feed Length

The STR-1 automatically feeds exactly the same length of strap for each package using digital control.

STR-1

■ Torque Tension

Torque tensioning provides very precise and stable tension, strong or weak.

Large and soft packages can be strapped with consistent tension.

Width	785mm	30 7/8 in
Height	750-950mm	29 1/2-37 3/8 in
Depth	545mm	21 1/2 in
Machine Weight	approx 55kg	121lbs
Package Size	min. 60mm (Width) ~ min. 2 3/8in	

Strap Width	5~15.5mm 1/4~5/8 in
Strap tension	approx 40~440N (4-45kgf) (8.8- 99.3lbs)
Sealing Method	heat seal
Power Supply	110-120V±20%,220-240V±20% Single Phase 50Hz 0.4kw
